Peer Review

1. #43
2. Nate Jennewein (nj29)
3. Ryan Brynjolfson (rrb244), Andrew Fujimoto (afg62)
4. Nate - 33.3 Andrew - 33.3 Ryan – 33.3
5. We worked collaboratively without leadership distributing the work and reward among the people. The collective good of the commune benefited from this shared leadership.
6. Nate - 33.3 Andrew - 33.3 Ryan – 33.3
7. Again the work was so collaborative it is hard to put borders as to where one man ends and the next begins. It was something special and it ended in a successfully completed milestone.
8. Nate - 33.3 Andrew - 33.3 Ryan – 33.3
9. When all you have is a hammer, every problem is a nail. We together were three hammers attacking all aspects of the milestone together including but not limited to coding, installation of sensors, troubleshooting wiring, and ensuring optimal tuning.
10. Nate - 33.3 Andrew - 33.3 Ryan – 33.3
11. I worked primarily on the strategy implementation in the abstract, while Andrew and Ryan brought my ideas to life in the form of code and hardware.
12. Nate - 20 Andrew - 60 Ryan – 20
13. Andrew shouldered the bulk of the load on our report with me only doing the circuit diagram and Ryan imputing other files. Andrew was our best writer and took this job as a result.
14. Nate - 33.3 Andrew - 33.3 Ryan – 33.3
15. I don't think anyone can be stated as doing more or less than anyone else. I helped a lot with little pieces here and there in fine tuning, while others coded and then the roles continually swapped in a kind of positionless system. The way our team worked it would be hard to say any one person did any one thing alone.
16. We adhered perfectly to our contract. Everyone was on time and put in the effort they could.
17. I learned that people, when given a chance to attack a problem, often approach it in a way that I would have never thought of. Also, I learned that my friends are great people, and that I should put more trust in those around me. Finally, I learned that I don't need to be in control all the time for good work to get done.

18. You all did a great job and this project was a lot of fun.
